

AquaSafe Premium Water Tank

Product Overview

The AquaSafe Premium Water Tank is a high-quality water storage solution designed for residential, commercial, agricultural, and industrial applications. Manufactured using virgin food-grade polyethylene, it ensures safe water storage while providing exceptional durability, UV resistance, and long service life.

Product Description

The AquaSafe Premium Water Tank combines strength, hygiene, and reliability in one advanced storage system. Built with rotational molding technology and UV-stabilized materials, the tank is engineered to withstand harsh weather conditions while maintaining water quality.

Key Features

- Food-grade virgin polyethylene material
- UV stabilized outer layer
- Leak-proof seamless construction
- Strong ribbed design for extra durability
- Corrosion and rust resistant
- Algae-resistant inner layer
- Suitable for potable drinking water
- Easy installation and maintenance
- Lightweight yet highly durable
- Long service life of 15+ years

Technical Specifications

Product Name: AquaSafe Premium Water Tank
Material: Virgin Food Grade LLDPE
Manufacturing Process: Rotational Molding
Tank Type: Vertical Cylindrical
Layer Type: 3 Layer / 4 Layer / 5 Layer
Color Options: White, Blue, Green, Black, Beige
Capacity Range: 500L – 5000L
UV Protection: Yes
Food Grade: Yes
Warranty: 5 Years

Applications

Residential, Commercial, Industrial, Agricultural and Water Storage Projects.

Warranty

5-Year Manufacturer Warranty covering manufacturing and material defects under normal operating conditions.

Marketing Taglines

Strong. Safe. Reliable.

Built to Protect Every Drop.

Advanced Water Storage for Modern Living.
